Total Profit by Product Category

Profit Margin by Product Category

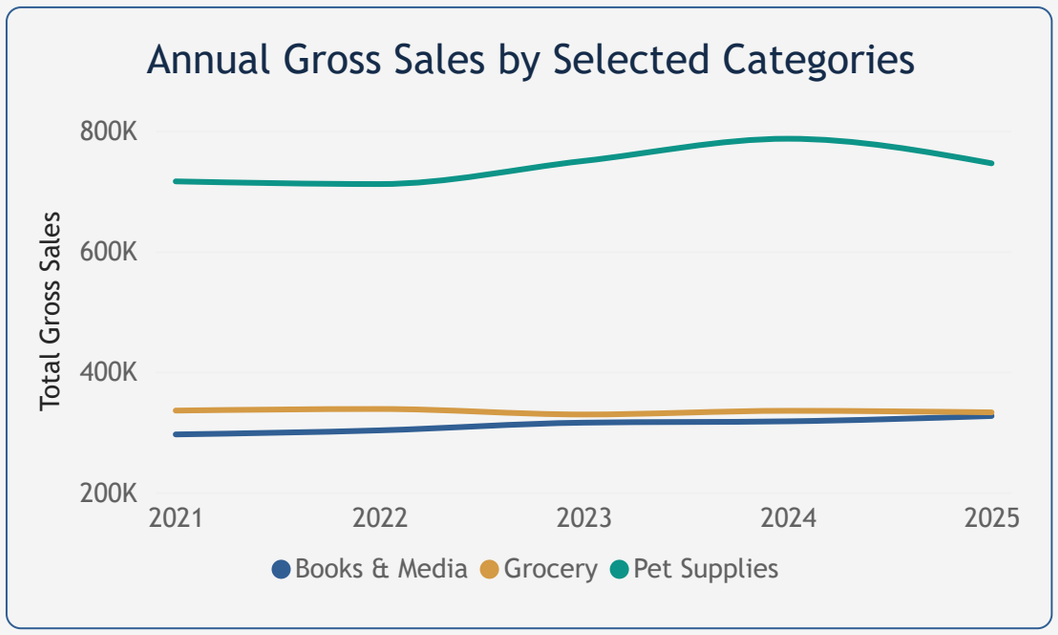

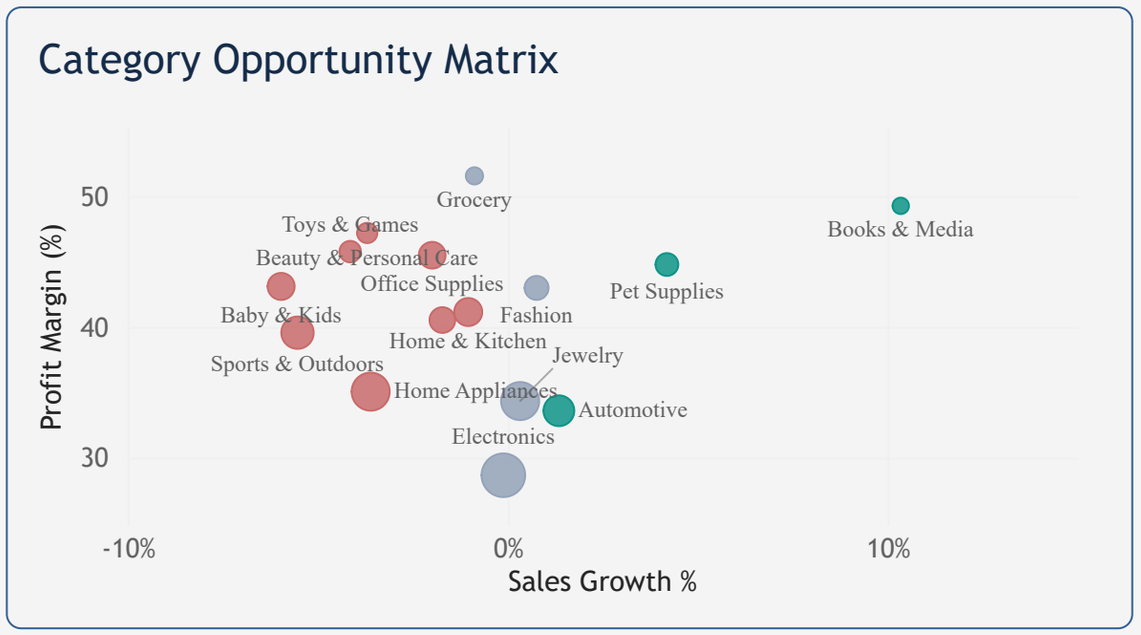

KEY BUSINESS INSIGHT

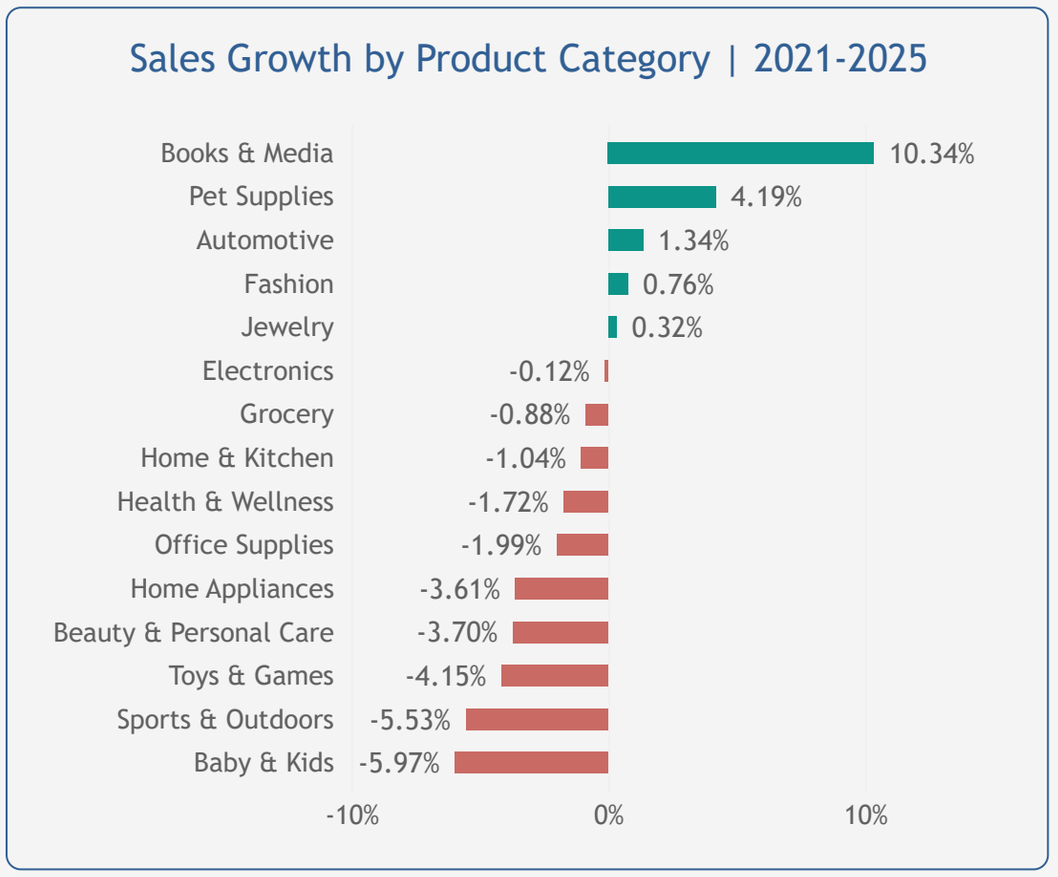

Electronics generates the highest total profit ($7.00M) but has the lowest profit margin (28.65%).
In contrast, Grocery (51.54%) and Books & Media (49.25%) lead in relative profitability despite generating lower total profit.
Business Implication: High total profit does not necessarily indicate high profit margins. Both metrics should be considered when evaluating product category performance.

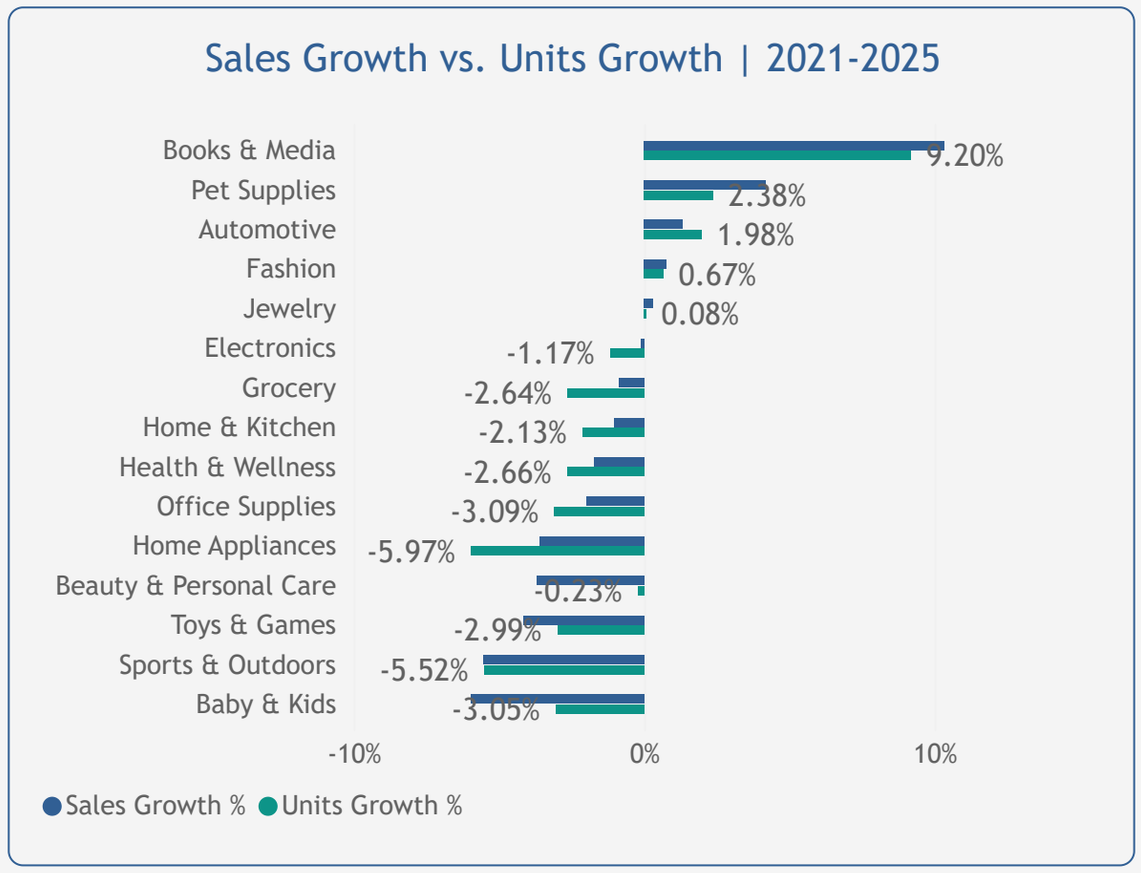

Assortment Expansion Opportunities

US E-Commerce | Category Growth & Profitability | 2021-2025

KEY FINDINGS & BUSINESS RECOMMENDATIONS

01 | Expansion Opportunities — Books & Media, Pet Supplies
Books & Media leads in sales growth (+10.34%) and units growth (+9.20%), with a 49.25% profit margin. Pet Supplies also shows positive sales growth (+4.19%) and units growth (+2.38%), with a 44.76% profit margin.
Recommendation: Evaluate targeted assortment expansion in both categories.

02 | High Profitability — Grocery
Grocery has the highest profit margin (51.54%), despite a slight decline in sales (−0.88%) and units sold (−2.64%).
Recommendation: Investigate declining demand while maintaining focus on profitable products.

03 | Total Profit Leader - Electronics
Electronics generates the highest total profit (approximately 7.0M) but has the lowest category profit margin (28.65%) and slightly declining sales (−0.12%).
Recommendation: Review product-level margins and cost structure to identify opportunities for profitability improvement.

Recommendations are based on historical trends and should be validated at the product level before implementation.
